❖ What Do You Do?

- ❖ The National Telehealth Foundation (NTF) is built on three pillars.
- ❖ The pillars focus on:
 - ❖ Funding for internal certification curriculum to provide on ramps to professional mental health career opportunities.
 - ❖ Three yr. funding for comprehensive mental health programs for students and staff including immediate households.
 - ❖ Coordination and development of new and existing Community Health Programs and Services.

❖ Who Benefits?

- ❖ The goal of the NTF is to help K-12 kids through mental health services in an extremely wide spectrum in a time of great demand.

❖ How Many K-12 Kids Can the Foundation Help?

- ❖ We can help kids on a local to a national level. As the foundation grows, the capacity to help k-12 kids grows along with it.

❖ What Makes NTF Unique?

- ❖ Nobody has ever created a foundation which impact the youth population in this manner. The ability to have direct relationships with schools, their k-12 students and the members of their communities is truly groundbreaking. The foundation and those who are involved have the ability to provide resources which can help students gain nearly instantaneous assistance with mental healthcare in their time of need.
